Coronavirus

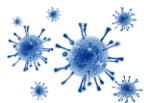

## Regional Breakdown of cases:

## CDC Update (Situation in the US):

CDC is closely monitoring an outbreak of respiratory illness caused by a novel (new) coronavirus named COVID-19. The outbreak first started in Wuhan, China, but cases have been identified in a growing number of other [international locations](#), including the United States. CDC will update the following U.S. map daily. Information regarding the number of people under investigation will be updated daily.

## CDC Response Updates:

## Coronavirus

### Level 3 Travel Health Notice: Widespread ongoing transmission with restrictions on entry to the United States

CDC recommends that travelers avoid all nonessential travel to the following destinations. Most foreign nationals who have been in one of these countries during the previous 14 days will not be allowed to enter the United States.

- [China](#)
- [Iran](#)
- [Most European Countries](#)
- [United Kingdom and Ireland](#)

### Level 3 Travel Health Notice: Widespread ongoing transmission without restrictions on entry to the United States

CDC recommends that travelers avoid all nonessential travel to all global destinations:

- [Global Pandemic Notice](#)

### Level 2 Travel Health Notice: Ongoing community transmission

CDC recommends that older adults and people of any age with serious chronic medical conditions should consider postponing nonessential travel to most global destinations.

### Level 1 Travel Health Notice: Limited community transmission

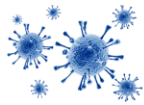

CDC recommends travelers practice usual health precautions recommended for their destination.

## World Health Organization Update:

WHO Regional Director for South-East Asia, Dr Poonam Khetrapal Singh, urged countries in the region to lift public health and social measures (so called lockdowns) in a graded manner and that Local epidemiology should guide focused action in 'new normal' COVID-19 world.

WHO Regional Director for Europe, Dr Hans Henri P. Kluge, emphasized that "our behavior today, will set the course for the pandemic", and highlighted how behavioral insights are valuable to inform the planning of appropriate pandemic response measures.

A UN policy brief on COVID-19 and mental health warns that substantial investment is needed to avert a mental health crisis. Reports already indicate an increase in symptoms of depression and anxiety in several countries.

Coronavirus

## Current Objectives:

1. Limit the spread of disease within Montgomery County.
2. Continue to monitor the situation in conjunction with the Ohio Department of Health and the Centers for Disease Control and Prevention.
3. Continue information sharing with partners.
4. Continue to provide information to the media and the public through interviews, social media and our website.

## *Long-term Planning Considerations:*

Continued monitoring and maintaining surveillance locally.

## *Epidemiology Syndromic Surveillance Summary:*

Below are links to both the CDC and WHO regarding the latest information.
